Let's see a fragment of the thumbnail story review

In the first story, named "Little thumb", a childless couple of peasant wants to have a boy, and asks out loud that they want to have a child "no matter how small he be." Seven months later the woman has a baby who "is no bigger than a thumb," and so they decide to call him Little Thumb. He was an "agile and wise creature." Little thumb tries to help his father with all the tasks, so one day he asks his father if he can lead his horse where he works, sitting in its ear and leading it like this, giving it directions. Little Thumb performs this task. Two men, surprised, watch the horse pass by as it is led by scandalous voices, and when they discover that the voice belongs to a person sitting in the horse's ear, they ask the peasant if they can buy Little Thumb to make a fortune from the exhibitions of the little being. Little thumb convinces the peasant to take the money the men offer him and goes with them, sitting on the brim of one of the men's hats. Soon after, Little Thumb gets to trick the men for they put him down and hides in a mouse hole. . .
